

CRACK MAINTENANCE
EQUIPMENT

The Crack Jet II cleans and dries the crack while etching the walls all in one convenient motion allowing you to do more with less. The Crack Jet II eliminates the need for large compressors, routers, and wire wheels and brings those units into one self-contained, and affordable machine.

- Heat: 2800° F of heat dries moisture in seconds
- Pressure: 90 CFM of pressure cleans debris and vegetation
- Portability: Designed to walk behind, tow, or, 30 Ft of Hose allows user to walk with just the wand, making even tight spaces easy to access
- Adhesion: Etching walls results in maximum rubber adhesion
- Improved Efficiency: Reduces time and labor costs
- Value Added: (1) 30 Propane Cylinder is included with purchase

- Heating Efficiency: Thermostatically controlled heating system allows for accurate heating of material
- Fuel Efficiency: Uses half the amount of propane as direct fire melters
- Heat Retention: Air Jacketed unit with high efficiency insulation
- Easy Pour: 2" flow valve extends out either side of machine for easy filling of rubber applicator
- Includes utility hand torch to heat flow valve, tools, pour pots, etc.
