## **KM International's Crack Maintenance Trailer Named Among the Top Products of 2018**

KM International's Crack Maintenance Trailer was recently recognized as a Top 30 Product of 2018 by Asphalt Contractor Magazine. The editors of the magazine selected winners based on customer research and equipment innovations that were gaining attention and traction on the job site.

Unveiled in 2017, KM International's Crack Maintenance Trailer continues to be one of KM International's most popular products among asphalt contractors. The ingenuity behind the CMT is that it brings all the crack filling equipment together as one single package, creating a comprehensive and easy-to-use product on the job site.

The asphalt crack maintenance trailer is specifically designed to accommodate the Crack Jet II, Km 55 Melter, MA 10 applicator, and is equipped with a utility storage area to store crack fill material and hand tools. It also includes an on and off ramp for easy loading of equipment.

"We wanted to design a crack maintenance package more tailored to the small to medium sized contractors who don't necessarily want to invest in a big 125 or 250 gallon rubber melter," said KM International President Cliff Cameron.

KM International's CMT is the only one of its kind and can help to generate revenue for any crack filling business, according to leaders of the North Branch, Michigan-based manufacturer.

For more information, contact KM International at 810-688-1234.

### **ABOUT KM INTERNATIONAL**

KM International has been manufacturing the highest quality asphalt maintenance equipment for more than 30 years. KM International operates out of a state-of-the-art manufacturing facility in North Branch, Michigan, and offers more than 40 different products to fit the needs and budget of any contractor or municipality, including its infrared asphalt recyclers and propane fired skid-mounted hotbox. KM International's equipment is used in every U.S. state as well as 44 countries around the world.
